

Senior Calibration Technician

INCOG BioPharma is seeking a highly motivated Senior Calibration Technician to join their Facilities and Engineering Department.

The Sr Calibration Tech will be a key individual contributor within the department, and will focus on ensuring safe operation of equipment and calibration of instruments, whilst utilizing their in-depth knowledge of calibration methodology, basic electrical aptitude, excellent problem-solving, exceptional communication, and organizational skills.

Key Responsibilities:

- Maintain & inspect all instruments throughout the facility including, but not limited to: HVAC, Water-for-injection (WFI) system, compressed gasses, refrigeration, plumbing, electrical, mechanical, plant steam / chilled water systems and laboratory instruments (as required).
- Manage the calibration status of all instruments via a Computerized Maintenance Management System (CMMS).
- Perform routine and unplanned calibration activities.
- Resolve issues that arise in day-to-day running of plant systems and process equipment instrumentation.
- Troubleshoot instrumentation issues & perform corrective maintenance, as needed.
- Communication of CAPAs across functions and define solutions to minimize system downtime and prevent recurrence.
- Schedule and coordinate calibration activities with 3rd party service providers and/or vendors or OEMs of equipment systems.
- Develop calibration program insourcing strategies.
- Partner with internal customers and equipment vendors to define calibration intervals and ranges.
- Perform instrumentation activities such as modifications, installations, commissioning and validation support, start-up of new equipment/instruments, and decommissioning.
- Assist in development & implementation of the Calibration Engineering budget.
- Maintain inventory of spare instruments, parts, and supplies.
- Work flexible hours to ensure production facility coverage

Education and Experience Requirements:

- Associates degree with technical training or equivalent military training
- 3 years of experience troubleshooting and calibration of system instruments in an operations or manufacturing setting
- Physically capable and available to work overtime and/or respond to alarms after hours, including weekends, and holidays

Preferred Qualifications (not essential):

- 5+ years' experience in a sterile pharmaceutical manufacturing facility
- Experience with Computerized Maintenance Management System (CMMS)
- Experience with cGMP manufacturing for pharmaceuticals and devices

Don't meet all the requirements? Don't sweat! We're always looking for an excuse to discuss your next opportunity. You might just surprise yourself...
